Capcom's All-new IP *Exoprimal* to Launch on July 14!

- Aims to support long-term sustainable growth with creation of online game -

Capcom Co., Ltd. (Capcom) today announced that *Exoprimal*, an all-new IP for multiple platforms, is scheduled for release on July 14, 2023.

Exoprimal is an online, team-based action game in which players step into the role of “exofighters” facing dinosaur outbreaks where packs of the ferocious creatures suddenly appear and attack humankind. Each exofighter is equipped with an exosuit, state-of-the-art powered armor specialized for their role in combat, as they fight alongside their comrades against the dinosaur threat. In the primary game mode, Dino Survival*, players gather lost data to piece together the mystery of the game’s story.

To further enhance awareness of this all-new title, Capcom will hold an open beta test for *Exoprimal* from March 17 – 20 (JST), which will feature a variety of exosuits and missions for players to experience.

Capcom remains firmly committed to satisfying the expectations of all users by leveraging its industry-leading game development capabilities in order to create highly entertaining gameplay experiences.

*A game mode where players form teams of five and contend with each other 5-on-5 in competitive PvE (player-versus-environment) to be the fastest to complete missions.
